KRAMEFF

SOLUTIONS LIMITED

# Automation Strategy

# Identify Objectives

- Define measurable outcomes
- Reduce ticket resolution time
- Improve proactive monitoring
- Increase operational efficiency

# Assess Current Processes

- Review ticket workflows
- Identify repetitive tasks
- Assess monitoring practices
- Surface pain points across teams

# Prioritise Opportunities

- Focus on high-impact improvements
- Automate ticket routing
- Automate escalation paths
- Introduce monitoring alerts

KRAMEFF
SOLUTIONS LIMITED

# Implementation

# Build Business Case

- Estimate implementation cost
- Define operational savings
- Measure ROI potential
- Secure leadership support

# Pilot Automation

- Start with controlled pilot
- Automate defined workflows
- Capture operational feedback
- Refine approach before scaling

# Measure Impact

- Track resolution time improvements
- Measure downtime reduction
- Capture user feedback
- Track automation utilisation

# Refine and Scale

- Expand automation scope
- Introduce dashboards
- Standardise automation practices
- Develop reusable automation assets

# Governance & Culture

# Automation Governance Model

Centre of Excellence
Strategy | Standards | Governance

Communities of Practice
Knowledge | Innovation | Adoption

# Train and Enable Teams

- Run automation workshops
- Encourage knowledge sharing
- Promote peer learning
- Drive organisation-wide adoption

# Automation Maturity Model

KRAMEFF
SOLUTIONS LIMITED

# Key Takeaways

# Successful Automation Requires

- Clear strategic objectives
- Strong governance and ownership
- Engaged teams and collaboration
- Measurement of impact
- Continuous optimisation
